

Almalinux LXC setup

Here is a simple review of what should be done in a newly created LXC using the image from Proxmox VE.

Step by step procedure

1. Install important packages

- update and upgrade

```
dnf update -y && dnf upgrade -y
```

- install basic packages

```
dnf install -y vim git tar wget bind-utils net-tools openssh-server
```

2. Create a user with sudo privileges

```
adduser thorgan  
usermod -aG wheel thorgan  
passwd thorgan
```

3. Start and enable `sshd` to accept SSH connections

```
service sshd start && systemctl enable sshd
```

Script procedure

```
#!/bin/bash  
  
dnf update -y && dnf upgrade -y  
dnf install -y vim git tar wget bind-utils net-tools openssh-server  
  
read -p "Enter username: " user  
adduser "$user"  
usermod -aG wheel "$user"  
passwd "$user"
```

service sshd start && systemctl enable sshd
